How to use Respondus:

To import quiz questions to Blackboard that you have written in Microsoft word, we use a tool called Respondus. In order to use Respondus, you must install it on your PC.

Please note that Respondus is only supported on Windows based PC's. To install Respondus, click

1. Click the following link:

https://www.montgomerycollege.edu/offices/elite/respondus/index.html

2. The Respondus software is password protected so you will be prompted to enter your MyMC ID and password. (*If you do not know your MY MC username or password, please contact the Montgomery College IT helpdesk at 240-567-7222*).

- 3. Click Submit on the Login to MyMC page.
- 4. The Respondus Installation Page will appear.
- 5. Click the Download Respondus software link to download the Respondus software.

- 6. The Respondus software will be downloaded to your computer to the location you selected in Step #5.
- 7. Double Click this file to begin the Respondus Installation.
- 8. Follow the remaining instructions listed on the Respondus Installation Procedure Page for direction on the software password and running Respondus for the first time.

How to use Respondus to import Quiz questions:

To import quiz questions that you have written in Microsoft word, we use a tool called Respondus. This document will show you how to format quiz questions in Word for use in Respondus. Once the questions have been properly formatted in word, you can import them into Respondus, and then publish them to Blackboard.

File Naming & Saving Conventions

Do not format your quizzes with any other text, besides the quiz questions. Do NOT put any titles, page numbering, or anything else in the document other than quiz questions, or Respondus will not be able to read your questions.

- 1. Give each quiz a meaningful name, i.e, quiz 1, etc.
- 2. Save each individual quiz in a separate file. You may save your file in the following formats:
 - a. Text File, (.TXT)
 - b. Rich Text File (.RTF)
 - c. *MS Word 2003* (.DOC) and *MS Word 2007* (.DOCX) Recommended format for tests with images. You can also retain formatting such as bold and italics using word documents.
- Regardless of the file format you use to save your file, you must follow the Formatting Questions guidelines below, otherwise your questions will not import successfully into Respondus.
- 4. Here are some examples of formatting questions for Respondus.

Formatting Questions

Multiple Choice

- 1. Who freed hundreds of slaves via the underground railroad?
 - A. Miriam Anderson
 - B. Sojourner Truth
 - *C. Harriet Tubman
 - D. Rosa Parks

*Notice the asterisk beside Harriet Tubman. Use this asterisk to indicate the correct answer to your quiz question. If you do not use the asterisk, the question will NOT have a correct answer when it is imported into the Learning Management System.

True or False Questions

2. Madam C.J Walker was the first African-American female millionaire. True or False

- *A. True
 - B. False

*Notice that the true answer choice must be listed first in order for Respondus to recognize that the question type is true/false. True must **always come as the first answer choice** for any true false question in the Learning Management System.

Importing Paragraph Questions

The logic for importing paragraph questions (also known as "essay" or "openended" questions) is similar to the multiple choice question format. The primary difference is that the first line of formatting must begin with "Type: P". This is followed by the "Title", the question number, and the question wording.

Example Paragraph Question

Type: P

Title: Michelson-Morely experiment

3. How is the Michelson-Morley experiment related to Albert Einstein's theory of relativity?

Importing Short Answer Questions

To import a Short Answer question, the first line of formatting must begin with "Type: S". This is followed by the "Title", the question number, and the question wording.

Respondus allows you to import only one correct answer per question, but it does permit you to enter multiple forms of that answer. In the example below, Zworykin, Vladimir Zworykin, and Vladimir Kosma Zworykin are all accepted as correct short answers for these questions.

Example Short Answer Question

Type: S

Title: Who invented television?

4. Who is known as the "father of television"?

a. Zworykin

- b. Vladimir Zworykin
- c. Vladimir Kosma Zworykin

Importing Matching Questions

The process of importing a "matching" question is similar to what is described above for importing multiple choice questions, but there are some key differences. The first line of formatting must begin with "Type: MT". This is followed by the "title" (which is optional), the question number, and the question wording.

Each *answer* (which consists of both portions of a correct match) must begin with a letter (a-z) followed by a period "." or a parentheses ")". The two parts of the match must be separated with an "=" symbol and there should not be any hard returns or blank lines within either parts of the answer.

Note: The portion of the answer to the left of the equal sign is static. The answer on the right of the equal sign will be included in a list of drop down choices in the student answer selection.

Example Matching Answer Question

Type: MT

Title: Scientific discoveries

- 5. Match the correct name to the discovery or theory.
 - a. Michelson-Morely = Speed of light
 - b. Einstein = Theory of Relativity
 - c. Marconi = radio waves

Spaces before or after the "=" symbol are optional, but it is important that an answer only uses the = symbol for the purpose of separating the two parts of the match.

Importing Multiple Response Multiple Choice Questions

The logic for importing multiple response questions is similar to what is described above for importing multiple choice questions. (Multiple Response questions are, essentially, multiple choice questions in which more than one correct answer can -- and generally should -- be selected by the student). The primary difference is that the first line of the formatting must begin with "Type: MR". This is followed by the "Title" (which is optional), the question number, and the question wording. Correct answers are designated with an asterisk. In this example, the correct answers are Albert Michelson, and Edward Williams Morley, and students must select both choices to receive a correct answer.

Type: MR

6. Which of the following individuals are credited with determining the exact speed of light?

- a. Albert Einstein
- *b. Albert Michelson
- c. Thomas Edison
- *d. Edward Williams Morley

To include a "title" or "feedback" with multiple response questions, follow the same formatting rules described above for multiple choice questions. For instance,

Including Feedback in Questions

You can include specific feedback for the student after every exam answer, by including the @ character on the line after an answer choice, and adding your feedback specific to that question.

You can also give general feedback to students which will appear regardless of the answer choice that they select. This feedback is provided by including the @ character after the question text, and adding general feedback. This feedback will appear regardless of the answer choice that the student selects.

You can also combine these two types of feedback. See the examples below for more information.

Example Feedback after every question

7. Who determined the exact speed of light?

a. Albert Einstein

@ No. Albert Michelson determined the exact speed of light.

*b. Albert Michelson

@ Yes. Albert Michelson won the Nobel Prize for Physics for determining the exact speed of light.

c. Thomas Edison

@ No, Thomas Edison did not determine the exact speed of light.

d. Guglielmo Marconi

@ No. Marconi did not discover the exact speed of light, but he did win the Nobel Prize for Physics for his work with radio waves.

<u>General Feedback</u>

8. Who determined the exact speed of light?

@ Albert Michelson was the first American to win the Nobel Prize in Physics (1907) for his measurements of the speed of light. His experiments laid the groundwork for Einstein's Theory of Relativity.

a. Albert Einstein

*b. Albert Michelson

When you have finished formatting your quiz questions, close the document you are working on. Respondus will not let you import the quiz that you have just created if the quiz is open.

Working with Questions containing Images

Adding Images with Microsoft Word (The Best Way)

If you would like to add images to your quiz questions, it is recommended that you use Microsoft Word. Images that are embedded in Microsoft Word files will automatically import into Respondus, without requiring any additional effort. You will not need to organize the images in a separate folder, or do any other manipulation. This is why it is recommended that if you are creating tests with Images, you use Microsoft Word.

Working with Images using .TXT, and .RTF files (Alternate Method)

If you are only able to create your tests using .TXT and .RTF files, you can still import questions, but more steps are required to get your images to import properly. This is why we recommend using Word when including images in text.

When you include images with your .RTF files, you will need to place all of your images in a separate folder. All test images should be stored in the same folder. Images must either be in .gif or .jpg format. You will then need to place the following tag where each image will appear. [img: "filename.jpg"]. The word "filename.jpg" should be replaced with the actual file name.

During the import process, you will specify the location of the single folder that contains your images. The example below shows you how to format questions if you are using the Rich Text format to import your tests.

Rich Text Images Example

9. The interferometer, shown here [img: "interferometer.jpg"], was

used by which of the following scientists.

- a. Albert Einstein
- *b. Albert Michelson
- c. Thomas Edison
- d. Vladimir Zworykin

Opening Respondus and Importing Questions (Video) Transcript is on Pages 9-12

1. Go to Respondus on the **2** Start (start window) of your computer.

🖮 Respondus	▶ 🕅 Respondus 3.5 Campus-wide
Respondus Equation Editor 4	🕨 🥑 🧧 Location: C:\Program Files\Resp

- 2. Respondus will open.
- 3. Change the current Personality to reflect the LMS you are using. At MC we are using Blackboard 9.1, so select Blackboard 7.x- 9.x.

Current Personality:	Blackboard 7.x - 9.x
Open	Open a Respondus file.

4. Click the import questions button

Start Edit	Settings	Preview Retrieval & Publish & Reports
Start	Open or Create	2
Introduction	Current Personality:	Blackboard 7.x - 9.x 💌
Open or Crea e	Open	Open a Respondus file.
	Create	Create a new Respondus file.
	Test Bank Network	Locate a publisher test bank ar an exam.
	Exam Wizard	Create an exam by copying iten Respondus Files.
	Import Questions	Import questions from a text file.

The import questions dialogue window opens.

5. Change the Type of File to reflect your file type in the type of file drop down window. My questions are in a .RTF File, so I select Rich Text.

Import Question	S	×
1. Select the file	to Import:	Pancel
Type of file:	Plain Text	- Help
File name:	Plain Text Rich Text Microsoft Word	Browse
Image Folder	Tab/Comma Delimited (CSV)	Browse

- 6. Then browse your computer for the rich text file quizzes by clicking the browse button (the arrow is the illustration above is pointing to the correct browse button.)
- 7. The File to Import Window Opens. Select the file, and then click the open button.

File to Impor			? ×
Look in: [) customquizimages	- 🗢 🖻 🖻	* 🎟 •
🖳 ~\$onzoEx	ampleQuiz.rtf		
AlonzoExa	ampleQuiz.rtf		
File name:	AlonzoExampleQuiz.rtf		Open
Files of type:	Rich text files (.rtf)	•	Cancel
			9.0

- 8. Decide what to name the Respondus file you are now creating. Normally you would create a new Respondus document, then make the changes indicated below:
 - The Respondus document is given a new name
 - The type of file created is an exam
 - Choose whether or not to give your questions a stem. If you choose to use a stem, it becomes the question title. Using a stem may make it more difficult to search for the questions later.

2. Choose where to add the new Questio	ns:
C Append the questions to the currer	nt document.
Create a new document, named:	alonzotest1
Type of file to create: 📀 Exam	O Survey
Use "stem" plus question number "ch01-" stem becomes "ch01-001	to create title, e.g. [t] '', ''ch01-002'',
3. Use the Preview button to check for p	roblems: Preview
4. Press the Finish button to complete the	process. Finish

9. Click the preview button to preview the status of your question import.

#	Title	Question Wording
1	t1001	Who freed bundreds of slaves via the underground railroad?
2	t1002	Madam C.J Walker was the first African-American female m
-		
÷		
ŧ		
	aminge	
0 11	an ings.	

10. You will see your quiz questions, and the question wording. Verify that the quiz questions, and the question wording are correct, and that there are no warnings. Generally you will get warnings if you have formatted your document **incorrectly**, and there are quiz questions with no answers, etc. Make note of these items, and correct them prior to importing the test into WebCT. If you are satisfied with the results of the preview, click the Finish button (circled above)

11. You will see the file saved dialogue box. Click the OK button.

Qu	Question List		
#	Title	Format	Question Wording
1	<u>t1001</u>	Mult. Choice	Who freed hundreds of slaves via the underground railroad?
2	<u>t1002</u>	True - False	Madam C.J Walker was the first African-American female millionaire. True or False
394			

12. You should now see your questions in the question list at the bottom of the screen.

You have now successfully imported your .rtf file into Respondus

Publishing Respondus Questions into Blackboard

To publish questions from Respondus, into Blackboard, you must know your logon password at Blackboard's direct URL: <u>http://bb-</u> montgomerycollege blackboard com/__lf you have never logged on using this

<u>montgomerycollege.blackboard.com/</u>. If you have never logged on using this URL, you must reset this password.

Have an acc	ount?
Please enter your	credentials and click the Login button below.
Username:	
Password:	Forgot Your Password?
	Login

If you do not know this password, you can reset your password, at the link above.

Click the Forgot Your Password Link. Follow the Steps on the Lost Password screen that appears to reset the password. Write down the password, you'll need it when you publish the Respondus exam to the Learning Management System

<u>Resetting your direct Blackboard Password (video)</u> transcript is on page #13</u>

1. Go to the direct URL for Blackboard: <u>http://bb-montgomerycollege.blackboard.com/</u>

2. Under the Username, and Password box, click the Forgot Your Password Link

Have an account?			
Please enter your (credentials and click the Login button below.		
Username:			
Password:			
	Forgot Your Password?		
	Login		

This opens the Lost Password screen. There are two options to recover a lost password. **Use** *the First Option, the Username Option if possible.* Enter the following in the username fields:

1.	Username Option	
	Enter your First Name, Last Nar email will be sent with instruction	ne, and Username to chan ons to change the password
	First Name	
	Last Name	
	Username	

First Name: Your First name

Last Name: Your Last Name

The Username for your test student is your MyMC ID **Example:** Your MyMC ID is karynwhite. Therefore, your username is karynwhite.

After completing the form, you will be sent an email to your Montgomery College email address with instructions on changing your Blackboard password. Follow the instructions carefully as you will need this information to log onto Respondus. The password that you type in the password field will be the password you use to set up communication between Blackboard and Respondus.

You can now use this username and password to log onto Blackboard using the direct URL.

Note that this Direct URL feature should only be used by MC Faculty. Students should still log onto Blackboard via the MyMC portal.

After you have reset your password, you may enter your username and password in the appropriate fields when you click the preview and publish tab.

Publishing to Blackboard (Video) Transcript is on Pages #14-18

1. Click the Preview and Publish Tab

2. The preview and publish screen opens.

Start Edit	Settings	Previe & Pub
Preview & Publish	Preview ?	
Preview	Preview	Before pu
Publish to Blackboard	The File	the Hesp browser-li
Update Settings		If you war
Print Options		"modify it returned t

3. Click the publish to Blackboard Link. This opens the Publish to Blackboard Screen.

- 4. Next, click the Publish Wizard button. Publish Wizard Opens
 - 1. Type of Publish Local File, Single Course, or Batch Publishing
 - Publish to single course
 - C Batch Publish to multiple courses
 - Save pool to local file for manual uploading.

5. Now we must create a link to the Blackboard server. We only have to do this process once. The next time we publish a test, Respondus will remember the settings in the link to our Blackboard server. You would click the Drop Down next to the Blackboard Server and select the name of the server that you are creating during this step.

For now, click	k the drop	down to the	left of the N	lew Blackboard Server.
----------------	------------	-------------	---------------	------------------------

Blackboard Server:	New Blackboard Server	•

C Create new Pool	alonzotest1
C Replace existing Pool	•
3. Additional options for Exam/Sur	vey
🔽 Apply Random Blocks to Ex	am
Apply Settings to Exam	
Link Exam to Content Area	and make available

A note aobut the options:

Exam/Survey

Create New Exam: This creates a brand new Test for students in Blackboard.

Replace Existing Exam: This will replace one of your existing exams in Blackboard, with the contents of the new exam in Blackboard.

<u>Pool</u>

Create new Pool: This will create a new bank of questions for your students. *It does not create a test for students.*

Replace Existing Pool: This feature will replace the contents of one of your existing Blackboard pools with the content of this exam.

Additional Options for Exam/Survey

Apply random blocks to Exam: If you are using Random blocks to randomize student quiz questions, click the checkbox to apply these settings

Apply settings to exam: If you've set up settings in Respondus, such as point values, clicking the checkbox will apply those values to WebCT

Link Exam to Content Area and Make available: If you click this checkbox, Respondus will link your test to a content area that you select, and make the exam available for your students to complete. 16. The Publish Wizard window will appear, letting you know the results of your guiz publishing.
